

MOHAMED SAMEH

Frontend developer

Cairo, Egypt | 01091791689 | mohamed.s.shokry3@gmail.com | www.linkedin.com/in/mohamed-sameh-4a665b213 | <https://github.com/noahwillson> | mohamed-sameh.vercel.app

Experienced in web development with a strong focus on creating innovative, interactive, responsive interfaces. Proficient in collaborating within a team environment on wireframes, components, and achieving pixel-perfect UI/UX. Demonstrates meticulous attention to detail for clean, maintainable, and reusable code. Adheres to best practices and coding standards, optimizing for maximum speed, scalability, and high-quality results. Excels in testing, debugging, troubleshooting, and problem-solving within tight deadlines. Possesses excellent verbal communication skills, adept at managing version control systems using Git, and experienced in RESTful APIs. Organized and technically skilled, leveraging analytical thinking and time management for optimal performance.

EXPERIENCE

February 2024 – Present

Internship | Anytime software (Prague, Czech Republic)

As an intern frontend developer at Anytime Software, I gained valuable experience and contributed to various projects under the guidance of senior developers. My responsibilities included:

- Assisting in the development of user interfaces for software products by implementing designs using HTML, CSS, and JavaScript frameworks.
- Implementing user interfaces using React.js components and Next.js for server-side rendering and routing.
- Implementing state management using React hooks or Redux for complex applications.
- Collaborating with team members to understand project requirements and objectives.
- Participating in code reviews and learning from feedback provided by experienced developers.
- Optimizing the performance of web applications by leveraging Next.js features such as automatic code splitting and prefetching.
- Writing clean and maintainable code following React and Next.js best practices.
- Testing and debugging frontend code to ensure functionality and performance.
- Learning about frontend development best practices, tools, and technologies.
- Contributing ideas and solutions to improve user interface design and user experience.
- Supporting senior developers in implementing new features and resolving technical issues.

During my internship at Anytime Software, I gained hands-on experience in frontend development and learned valuable skills that will help me pursue a career in this field.

PROJECTS

Zen Anime | <https://zen-anime-eight.vercel.app>

- Took charge of developing the Zen Anime website, handling both front-end and back-end tasks. Utilized Next.js for efficient web performance and integrated the Shikimori API seamlessly, giving users easy access to a wide range of anime and manga content.
- Implemented NextAuth.js with Google provider for secure user authentication, ensuring a smooth sign-in process. Introduced personalized features like watch lists, allowing users to customize their experience according to their preferences.
- Designed intuitive interfaces for managing preferences and tracking favorite series, prioritizing simplicity and user-friendliness. Ensured smooth integration and optimized functionality across the platform without the need for a dedicated back-end team.

Dream Restaurant | <https://dream-restaurant.netlify.app>

- Collaborated in a front-end team to develop a customer-centric web application using the MERN Stack for online food ordering and reservation management.
- Led the implementation of a seamless online ordering system with intuitive menu navigation, user-friendly order placement.
- Contributed to the creation of the reservation systems, ensuring users can easily create reservations efficiently.

EDUCATION

2019 - 2023

Bachelor's degree in law | Ain Shams University

SKILLS

- HTML5
- CSS
- Tailwind CSS
- JavaScript
- TypeScript
- Git
- MUI (Material UI Library)
- Framer Motion
- React.js
- Redux toolkit
- Daisy UI
- Chakra UI
- Next UI
- Next.js
- Next Auth
- MongoDB
